2 Acres for calendar year (irrigation season), except on Salt River project data are for corresponding "agricultural year," October, 1919, to September, 1920.

3 Reclamation Service was prepared to supply water.

4 Irrigated crops. Excludes small areas on few projects cropped by dry farming.

5 Data furnished by Salt River Valley Water Users' Association, which operated the project.

6 Includes 5,596 acres reported as vacant, 3,032 acres of "home tracts," and 3,146 acres within town sites, on which no crop was reported.

7 Data furnished by King Hill Irrigation District, which operated the project. This was built under private auspices and is under reconstruction by the United States.

8 Data furnished by Minidoka Irrigation District, which operated the division.

9 Crops reports covered an additional area of 12,760 acres cropped by dry farming, producing crops worth \$102,500, or \$8 per acre.

10 Figures are for 203 irrigated farms, which included small tracts farmed without irrigation. In addition 3 units farmed "dry" reported a value of \$900 from 45 acres pastured or cropped.

11 Figures are for 151 irrigated farms, which included small tracts farmed without irrigation. Pending construction of storage, a full water supply is not available.

12 Approximate area under ditch. Pending construction of storage, the available water limits area that can be served.

13 For crops in full production, excluding 9,720 acres of wild-grass pasture and 4,769 acres otherwise not in full production. For all crops, \$37.80.

¹ *General note for irrigation tables.*—Source: The United States Reclamation Service, Department of the Interior. The figures given in these tables relate only to lands served in whole or in part by works controlled by this Service. In 1920 the area so served amounted to 2,205,420 acres (1,223,480 acres in the Reclamation Service projects proper, and 981,940 acres served by Reclamation Service works, usually a partial water supply through private canals under Warren Act contracts). Data are for calendar year (irrigation season) except on the Salt River project, Ariz., data are for corresponding "agricultural year," ended Sept. 30, 1920. Unless otherwise indicated, figures are restricted to irrigated areas covered by crop reports, excluding small areas cropped by dry farming on a few projects, the area served under Warren Act contracts, and the three Indian projects in Montana, the works for which were constructed by the Reclamation Service. All value figures are intended to show the value received by the farmer for his crops, whether sold on the farm or in town, with or without baling, boxing, etc. If fed by the farmer, the crop is given a value representing the average selling price on the farm.

¹ In the tabulation for each State, crops for which the area reported was less than 500 acres were omitted. The crops omitted, however, form such a small part of the total as to be negligible. The figures given cover lands served by works controlled by the United States Reclamation Service. In 1909 the acreage so served constituted 2.9 per cent of the total acreage irrigated in the United States, since which time the latter acreage has increased to about 63 per cent.

² No one crop reported with as much as 500 acres.

¹ Does not include cost of operation and maintenance for rice-growing districts in Gulf States; consequently figures for 1909 and 1919 are not comparable.

² A minus sign (-) denotes decrease. Per cent not shown when more than 1,000.

³ Not reported in 1909.

⁴ When water is pumped, cost of operation and maintenance includes cost of fuel and attendance.

¹ For 1890 the rank of Arizona advances from 43 to 47, when the population specially enumerated is included; and that of Oklahoma advances from 46 to 39, when the population specially enumerated in Indian Territory and on Indian reservations is included.

² Includes South Dakota.

³ The ranking of Oklahoma in 1900 was 38 and Indian Territory 39. The present ranking for the same census is based on the combined population of Oklahoma and Indian Territory.

⁴ For 1890 the rank of South Dakota advances from 37 to 35 when the population specially enumerated is included.

POPULATION—DENSITY BY STATES.

No. 30.—DENSITY OF POPULATION PER SQUARE MILE AT EACH CENSUS, 1790 TO 1920: BY STATES.

[Source: Reports of the Bureau of the Census, Department of Commerce.]

[NOTE.—In computing density of population for the United States, the areas and population of Alaska, Hawaii, and Porto Rico in 1900 and 1910, of Alaska and Hawaii in 1890, and of Indian Territory in 1860, 1870, and 1880 are not considered. The area of Indian reservations, outside of Indian Territory, is included in the area of the States and Territories in which they are severally situated, and in that of the United States, although the population of these Indian reservations was not ascertained, and for this reason can not be considered in figuring density of population at the censuses prior to 1890.]
